📄 PROFILE

Computer Science and Econometrics student at **AGH University of Krakow** with a strong technical background. Focused on data analysis and relational databases (**SQL**). Currently seeking internship or junior-level opportunities to make first steps in Data segment.

🧠 SKILLS

Databases:

- SQL (JOIN, data agregation, subqueries, CRUD), PostgreSQL, BigQuery

Analysis & Visualization:

- MS Excel (Pivot Tables, VLOOKUP/XLOOKUP),
- Power BI (Data Modeling, DAX, PowerQuery), Tableau

Programming:

- Python (Pandas, NumPy)
- HTML/CSS, C - basics

Systems:

- Windows environment, Linux (foundational knowledge).

🎓 EDUCATION

Computer Science & Econometrics

AGH University of Cracow (part-time)

10/2025 – 06/2028 | Kraków

Statistics, Programming, Econometrics, Databases, Data Analysis, Git

Information Technology

ZS nr 1 Gorlice

2019 – 2024

🌐 LANGUAGES

English

B2/C1

📁 PROJECTS

E-commerce Profitability & Logistics Analysis 🔗

- Goal: Identified low-margin product niches affected by high shipping costs using the Olist dataset (100k+ orders).
- ETL & SQL: Designed and implemented a relational database in PostgreSQL. Developed advanced queries (Joins, CTEs, Window Functions) to aggregate complex sales data.
- BI & Visualization: Built an interactive Power BI dashboard with a live connection to the database (DirectQuery/SQL).

Real Estate Market Analysis (End-to-End Data Project) 🔗

- Process: Designed a fully automated ETL pipeline to extract apartment listings from major platforms.
- Automation: Developed a Python (BeautifulSoup) script using Regex for data extraction and cleaning (price, area, location).
- Database: Implemented a PostgreSQL database to ensure data consistency and optimized analytical queries.
- Visualization: Created a Power BI dashboard to visualize price trends by district and identify market outliers (undervalued offers).
- Best Practices: Applied engineering standards: error handling, version control (Git), and technical documentation.

📜 CERTIFICATES

- Google Data Analyst 🔗
- Hands-on Introduction to Linux Commands and Shell Scripting
- Databases and SQL for Data Science with Python 🔗
